

2016 Research Administrator Day campus event

Celebrate UCSF research administrators

If you prepare and submit proposals, manage research projects or financials, negotiate contracts and awards, or oversee research compliance, join us on Friday, September 23rd to celebrate research administrators at UCSF.

Research Administrator Day is observed annually in September to recognize the invaluable contributions made to the global research enterprise by research administrators.

Connect with Principal Investigators and other research administrators on campus.

Dr. Keith Yamamoto, Vice Chancellor for Science Policy and Strategy and Vice Dean for Research, will kick-off the day with introductory remarks. Immediately following, Drs. Edward Chang (Neurological Surgery), Jaime Sepulveda (Global Health Sciences) and Diane Barber (Cell and Tissue Biology) will discuss “innovation” in a panel facilitated by Dr. Yamamoto.

Beginning at 11:30 am, research presentations will highlight some of the projects that are made possible by research administrators.

Dr. Atul Butte (Institute for Computational Health Sciences) will end the presentation with closing remarks.

Breakout sessions will provide opportunities to engage with other research administrators on campus about hot topics in research administration. Food and live music will be provided to nourish your body and soul!

Join us for all or part of the day – the event is structured to allow participants to come and go freely.

Friday, September 23
10 am – 2 pm

William J. Rutter Center
1675 Owens Street

10 – 10:10 am

Introductory remarks

Dr. Keith Yamamoto
